

Task Force France

Achievements since October 2003

Patrick Cocquet, *Chairman*

Brussels, 14 January 2004

Document on recommendations

- **Recommendations for a Strategic Plan in the Development and Implementation of IPv6 Technologies in France**
 - ✓ The IPv6 Task Force France recommends explicit actions within a strategic plan defined for the development and use of IPv6 technologies in France.
 - ✓ The Task Force's recommendations fall into three categories: the first targets public authorities and services agencies, the second, the private sector, while the third focuses on the organisational and monitoring requirements for the strategic implementation of IPv6.

Networld+Interop Paris

The Task Force's recommendations reinforces the guidelines I gave ... calling for the progressive deployment of IPv6 to begin without delay.

Therefore, we will certainly take into account the recommendations, to plan a migration of the State's public information services towards IPv6, » said Claudie Haigneré, Minister for Research and new technologies (Networld+Interop Paris 2003)
